DETAILED ACTION

1. Receipt is acknowledged of the amendment filed 9/24/02 in which the independent claim 1 was amended.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Ochi et al, US Patent No. 5,416,358.

Ochi et al disclose an IC card including frame with lateral hole for injecting encapsulating resin comprising: an electronic module including an antenna coil and an integrated circuit 3 electrically connected to each other; an a hollow resin case 7 provided with a first slit 7c, wherein the electronic circuit module is contained in the hollow resin case 7, and the first slit spatially connects an inside and an outside of the hollow resin case (see figures 1-6, 29-32; col. 8, line 1+).

Re claim 2, wherein the component 4 serves as a shielding plate provided between the electronic module and the first slit and is provided with a second slit (see figure 1 and 29).

Re claim 3, wherein the antenna coil and the integrated circuit are provided on a single board 2.

Art Unit: 2876

Re claim 4, the hollow resin case is formed by allowing a first part and a second part to join each other and the first slit is provided in a portion where the first part and the second part join each other (see figures 3, 4).

Re claim 5, the electronic module is positioned close to one face inside the hollow resin case and the first slit is provided in a face opposite the one face of the hollow resin case.

Re claim 6, wherein a plurality of shielding plates 4 are provided between the electronic module and the first slit and every shielding plate is provided with a slit (see figures 3-5).

Response to Arguments

4. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

The limitations, "the first slit spatially connects an inside and an outside of the hollow resin case" required further consideration and search.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2876

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
